

DERMA CLINICAL - MY SKIN **PROTECTED**

MY SKIN PROTECTED

MY SKIN **PROTECTED** ANTI-OXIDANT POWER SERUM

- Vitamin C, B, E and Ferulic acid
- An antioxidant powerhouse serum
- 20% vitamin C and super-charged with Ferulic acid,
- Ferulic acid increases its free radical fighting ability.
- Also enriched with vitamins B and E
- Boost natural defence against damaging oxidation caused by pollution, toxins, and other environmental stressors.
- Provides anti-oxidant benefits to fight free radicals
- Antioxidants defend against free radical damage
- Helps brighten and improves elasticity of skin

MY SKIN PROTECTED - ALL LIGHT PROTECTION SPF 50

A powerful Anti-Ageing sunscreen for the face with protection against: Ultraviolet (UVA- & UVB- Rays), Infrared (IRA- & IRB- & IRC Rays), Visible light (HEV blue/violet light)

The sun radiation that reaches the skin is constituted by:

*Ultra Violet (UV) =7% *Visible light(HEV)=39% *InfraRed (IR)=54%

Ultraviolet (UV): UVA, UVB & UVC rays. UVA is forming the majority of UV rays that reach the earth with an intensity that presents all year round. These rays induce irritation within the skin and generate free radicals that cause skin damage (pigmentation, wrinkles, skin sensitivity, weakening of its defence mechanism and, in the long term, potentially skin cancer). As UVA is the major contributor to skin ageing, we have increased % UVA filters to give better UVA protection against ageing. The aim is to obtain maximum UVB & UVA protection, more than what the regulations require.

Infrared(IR): IRA, IRB & IRC. Infrared induces significant production of Free radicals in the dermis and diminishes the skin's antioxidant capacity. IR(A) penetrates deep into the skin (two-thirds reach the dermis) and does not significantly increase the skin temperature. It is a long wavelength of low energy. IRA radiation generates an important quantity of ROS that leads to the destruction of the fibres of collagen type 1 by an enzyme MMP1, also downregulation of collagen type 1. This means that existing collagen is damaged and not sufficiently replaced as the production of new collagen is reduced. Therefore, IRA is an important contributor to the photo-ageing process which accelerates the appearance of wrinkles, age spots and discoloration and makes the skin lose its firmness and elasticity. All light protection spf 50 contains an IR Guard/Blocker to protects the Mitochondrial DNA, it blocks IR-induced free radical formation, inhibits light-induced skin aging-even in deep skin layers, prevents the loss of skin density.

When you look at a chart about the sun's damaging UVA and UVB rays, you'll see that their wavelengths range from 280 nm to 400 nm ("nm" stands for nanometer, which is a measurement of length). Next on the spectrum is blue light, defined as light whose wavelength ranges from 380 nm to 500 nm. (The entire light spectrum goes up to 700 nm.)

The blue light portion is what emanates from digital devices, such as computers, tablets, flat screen TVs, fluorescent light bulbs, and smartphones. Both types of UV rays and blue light are bad for your skin and eyes. Long-term blue light exposure to concentrated sources of blue light energy can cause skin damage, including color changes, inflammation, and weakening of the skin's surface. Simply put, blue light promotes stressors in skin that cause photo-aging; that is, aging from exposure to light.

ALL LIGHT IR-A shield gives prolonged protection after sunset

ALL LIGHT contains the Blue/violet Light Melanin Blocker to protect the skin from this high frequency light with wavelengths from 400nm to 500nm. (HEV: High Energy Visible Light). This prevents Oxidative Stress and the generation of an Impaired Barrier.

Water Resistant, doesn't burn the eyes.

Squalane moisturises the skin, has no odor and is non-comedonal, also anti-bacterial properties, anti-ageing. It is 100% natural & sugar derived to reduce wrinkles & enhance spreadability.

Antioxidants, Vitamin E & Ubiquinone (coenzyme Q10) (anti-ageing).

Tripeptides (anti-ageing) that boosts Collagen significantly and it also protects its degradation. It improves skin texture, reduces the appearance of wrinkles & rejuvenates & smoothens the skin.

Alpha Lipoic that has very effective anti-ageing & anti-inflammatory properties.

L-Arginine is anti-ageing by reducing inflammation, aiding tissue formation and is involved in collagen synthesis.

L-Valine (anti-ageing) that stimulates the cells to produce more collagen & elastin

MY SKIN PROTECTED - SUN CARE CREAM SPF 50

Broad spectrum protective lotion recommended for all skin types:

- UVA & UVB protection.
Velvet formula ensures subtle brightening, complete care and multi cellular UV and IR protection
- Chemical and organic sunscreen formula (no physical screens due to the white pay off.)
- Ideal for all Fitzpatrick skin tones.
- Product soothes irritation and hydrates the skin.

SKIN TIP: Use with any skin lightening product. Remember not all sunscreens are equal or regulated.

Re-apply regularly during the day.

DERMACLINICAL has manufactured this sun protection to protect the skin through the skin lightening process ensuring the best protection during treatment.

MY SKIN PROTECTED - SKIN FIX

- Hydrating cream maintaining high levels of moisture and comfort throughout the day
- Natural squalene locks in moisture
- First aid for damaged skins
- Repairs skin barrier
- Can be used on damaged and open skin to assist in the repair

Directions for use:

Apply after serum in the morning and/ or evening

Key Ingredients:

- Squalene
- Aloe Barbadensis Leaf
- Tocopherol (Vit E),
- Liquorice Root extract,
- Lemon extract (Vit C)

MY SKIN PROTECTED - SKIN FIX ULTRA

A superb ultra rich nourishing formula, that contains probiotics, antioxidants, moisture retaining ingredients for the most ideal skin barrier. As a plus, it brightens and promotes youth

Main ingredients:

Gluconic Acid

Cell renewal, exfoliation, antioxidant.

Beta-Carotene

Reduces UVA light induced damage, reduces oxidative stress, precursor of Vitamin A.

Mela Clear 2

Assists in the elimination of pigmented cells.

Sutilains

A Proteolytic enzyme derived from **Bacillus Subtilis**. An effective **pro-biotic** that is wound healing and anti-inflammatory. Also suitable for dissolving the intercellular matrix of an over thick cornea stratum, desquamating dead skin cells, promoting cell turnover, smooths rough skin, leaving the skin brighter. Assists in the further absorption of active ingredients.

Tranexamic Acid:

A highly stable, non-exfoliating acid. Anti-inflammatory, preventing melanin formation, lightening, and preventing melasma. Brightens all over skin tone.

Arbutase :

To control Tyrosinase, lighten dark patches and general skin tone.

Sodium Hyaluronate :

Has a lower molecular weight than HA, so is easily absorbed into the pores. HA works on the skins surface; SH works at a deeper level. It helps the skin to absorb a large amount of moisture from the skins surface, strengthening its long-term “moisture locking” ability.

Ceramide 2 :

Applied topically, it captures and binds moisture in the epidermis. Ceramide 2 is a type of lipid that exists between the skin cells to moisturize and keep the epidermal barrier intact.

Dipotassium Glycyrrhizate (Licorice Root Extract):

Is a safe and gentle whitening ingredient to control the activity of Tyrosinase and its formation. Also, an ideal cell renewal extract that is non-irritating, non-sensitizing and non-phototoxic extract that regulates sebum production.

Suitable for: All skin types, especially for very dry and dull skin, with uneven skin tone.

DERMA CLINICAL - MY SKIN CLEANER

MY SKIN CLEANER

MY SKIN CLEANER DEEP PORE WASH

Enzymes of Papaya and Pineapple assist with a mild exfoliation of the skin

- A unisex light foaming gel – extract of coconut is the foaming agent.
- Ideal for all skin types leaning towards combination and oily skin
- Not suggested to remove eye makeup
- Can be used on Polaris keratosis (chicken skin on the back of arms and thighs)
- Recommended for skins that suffers from congestion
- Ph 5.6, ensures healthy microbiome of the corneum
- Can be foamed up with a men's shaving brush – ideal as an aesthetic pre-cleanse in clinic
- Contains natural anti-inflammatory and antiseptic ingredients that won't strip the skin natural barrier
- The wash is a rich gel full of oils that will not dry out the skin

NB: Alkaline cleansers strip the skins natural barrier. Impaired barrier function in the skin can lead to:

- Dehydration
- Congestion
- Milia
- Inflammation
- Pigmentation
- Disruption of skin's natural microbiomes

DERMACLINICAL - MY SKIN CLEANER

MY SKIN CLEANER 3-IN-1 CLEANSING SOLUTION

What is it

Mild yet effective, 3-in-1 Cleansing Solution elevates effortless skin care to new heights. This tri-action formula acts as both a gentle cleanser, a **waterproof eye makeup remover** and a **toner** in one. Tiny micelles act as magnets to trap dirt, oil, and makeup without stripping away natural moisture.

Why it's different

- **Microscopic micelles** act as magnets for dirt, oil, and impurities. Suspended in soft water, they easily sweep away the day. Using micellar clusters, micellar waters are multi-functional, rinse-free cleanser replacements that leave skin supple and revived. Superfruit Infusion
- **Superfruit extracts** provide an instant infusion of vitamins and antioxidants. These botanicals boost skin's luminosity while helping defend cells from the damaging effects of free radicals.

Key benefits

- Cleanses and tones
- Removes waterproof makeup
- Softens and nourishes
- Removes excess oil
- Hydrates dry skin concerns
- Suited for all skin types

How it works

Micellar Waters were originally formulated as a cleansing alternative to help Parisians deal with the city's notoriously astringent water supply.

Micelles are microscopic clusters of oil and dirt-absorbing molecular spheres.

Hydrophobic at one end and hydrophilic at the other, micelles link together in a circle, leaving a space in the middle.

When applied to the skin, the micelles attract impurities, holding them in the empty space and effectively sweeping them away.

The superfruit extracts chosen for this formula were selected for their superior antioxidant capabilities.

Together with the micelles, these botanical extracts are suspended in deionized soft water, to ensure gentle hydration.

Key ingredients

SUPER fruit Antioxidant Complex A potent blend of antioxidants that defend against damaging oxidation caused by pollution, toxins, and other environmental stressors.

Coffee extract has a high concentration of revitalizing caffeine and essential fatty acids, plus moisturizing vitamin E.

The Noni fruit grows abundantly throughout the Hawaiian islands. It contains over 165 beneficial compounds, and is incredibly rich in polyphenol antioxidants.

Mangosteen is replete with nutrients, including vitamins C, B6, and B12, as well as calcium, potassium, zinc, and manganese.

Found only in Amazonian rainforests, Acai berries contain high levels of anthocyanins, which are extremely effective antioxidants. It also includes high levels of vitamins A, C, and E.

Also, native only to the Amazon, Camu Camu is acclaimed for being the densest natural source of Vitamin C in the world.

Goji berries, also known as wolfberries, are native to the subtropical regions of China, and have been used there medicinally for centuries. Goji berries contain concentrated amounts of antioxidant compounds, as well as trace minerals, vitamin A, and amino acids. Known as the fruit of the gods, pomegranates are the epitome of a superfruit. They contain high amounts of conjugated fatty acids, vitamins B, C, and potassium.

Aloe Vera (Aloe Barbadensis Leaf Juice) Extracted from the succulent leaves of the aloe plant, aloe vera is renowned for its extraordinary moisturizing, soothing and protective benefits.

Green Tea Extract (Camellia Sinensis Leaf Extract). Picked at the height of potency, green tea extract is known for its powerful antioxidant capabilities, as well as its calming and soothing nature.

MY SKIN CLEANER HEALING MILK CLEANSER

A healing milk that gently removes makeup and lifts away impurities. Your dry skin will feel balanced, soft and clean with no oily residue.

Active ingredients include:

Avocado Anti-wrinkle, softening and healing

Cucumber Softening, refreshing and astringent

Marigold Antiseptic, healing and anti-seborrheic

Tea Tree Anti-microbial, antiseptic and healing

To use:

Pump a small amount onto your fingertips, apply to skin and massage in circular motions.

May be used on the eyes. Splash off or use a wet cotton pad to remove.

50m and 120 ml

MY SKIN CLEANER LACTIC ACID 10% EXFOLIATING GEL

Why it's different:

Skin Rejuvenation:

Lactic acid exfoliates and resurfaces the skin without irritation. It helps to loosen dead skin, while its hydrating properties soften and condition the skin's surface.

Unrivalled Efficacy:

This formula utilizes each ingredient in its most effective form, selected specifically for its ability to deliver real results. Stimulates the production of GAGS – ensuring a 'trellis' work for new collagen production to lay flat.

How it works:

Lactic acid is a unique form of alpha hydroxy acid that refines skin texture and helps to minimize the build-up of impurities within the pores. As we age, the skin's natural exfoliation process slows. Lactic acid helps to jumpstart this process by dissolving dead skin and encouraging bright, healthy skin to appear. As fresh skin is unveiled, lactic acid nourishes and softens to promote a radiant glow. Lactic acid also boasts anti-aging properties: It supports collagen to visibly smooth and firm, so skin looks younger and more vibrant.

To use:

Saturate a gauze or cotton pad, and briskly move across face, neck and décolleté. Remove with water after 15 minutes, or layer with Retinol 100 serum or Retinol 50 cream.

Use once or twice a week. Use on the eye area once a week.

YOU CAN BLEND FADE FAST INTO THE LACTIC ACID 10% TO INCREASE EFFICACY FOR PIGMENTATION (MINI PEEL)

MY SKIN CLEANER GLOSS PADS

Reveal clearer, more luminous skin with these triple-exfoliating pads. A concentrated blend of salicylic, lactic and mandelic acids sweep away dead skin that dulls the complexion, creating a bright, radiant glow. These exfoliants also promote skin clarity and even tone, while helping to rid pores of impurities. Soothing herbal extracts keeps the appearance of redness in check. Suited For All Skin types.

Skin Concerns

- Dullness
- Signs of aging
- Discoloration
- Enlarged Pores
- Blemishes

How it works

- Exfoliates dead skin
- Brightens and boosts radiance
- Improves the appearance of dullness
- Targets the look of dark spots, irregular pigmentation, discoloration and large pores
- Smooths skin texture and reduces the appearance of fine lines
- Supports skin clarity

Tri-Exfoliating Complex

A trio of revitalizing acids includes alpha and beta hydroxy acids. This smart combination helps to rejuvenate the skin, reduce dead skin buildup and minimize the appearance of pores.

Brightening Botanicals

Botanically derived ingredients like licorice and bearberry extract mimic the effects of traditional brightening agents, focusing on dark spots and discoloration, while Chamomile extract provides antioxidants and a soothing effect.

Unrivalled Efficacy

This formula utilizes each ingredient in its most effective form, selected specifically for its ability to deliver real results.

Key ingredients:

Lactic Acid: Lactic acid is a naturally occurring acid in the alpha hydroxy acid family. It gently exfoliates, encouraging the shedding of dead skin and helping to reduce the appearance of fine lines and discoloration.

Mandelic Acid: This gentle alpha hydroxy acid is known as a natural skin brightener as it helps to target blemishes, discoloration and wrinkles while minimizing irritation.

Salicylic Acid: Salicylic Acid is a beta hydroxy acid that focuses on the surface of the skin, helping to resurface irregular texture and dead, dry skin that can lead to blemishes and clogged pores.

Chamomilla Recutita (Matricaria) Flower Extract (Chamomile)

Chamomile extract helps to soothe and condition delicate skin.

Salix Alba Bark Extract (Willow Bark Extract)

With its high antioxidant capacity, willow bark extract fights visible signs of aging and photodamage.

Youthful skin is naturally bright, luminous and even-toned. These gentle exfoliating pads help to restore this healthy glow to dull, dry or aged skin.

A combination of salicylic, lactic and mandelic acids work together to remove dead skin and revitalize the surface. They help to refine skin texture and minimize the look of enlarged pores, giving skin a smoother, more even appearance. Signs of aging like fine lines and discoloration are visibly reduced, so skin appears fresher and more vibrant.

Directions for use

In the evening after cleansing, use a pre-saturated peel pad and gently buff skin on face, neck and décolleté.

Slight tingling during application is normal. Leave on for 1 to 3 minutes and rinse with cool water to neutralize.

Follow with a moisturizer to replenish moisture.

MY SKIN CLEANER DEEP PORE MASK

This intensive corrective treatment complements your daily blemish fighting routine by removing dirt and impurities better than cleanser alone.

The clay-based formula targets problem areas, spots and clogged pores to reduce congestion and balance the skin.

Bentonite is a mineral rich clay that is negatively charged. The ions penetrate deeply into the pores and has a magnetic effect that pulls oil and impurities from the clogged skin.

Salicylic Acid is a beta hydroxy acid, proven to exfoliate dead skin and working to reduce blemishes and swelling by dissolving impactions.

Zinc Oxide is a multi tasking mineral that supports healthy skin, protects the skin barrier, absorbs excess oil and reduces sebum buildup within the follicles. Zinc also calms and soothes whilst reducing redness.

Your skin will be left smooth, soft and clear.

Key Benefits:

Draws excess oil and impurities from the skin

Targets blemishes and problem areas

Supports skins natural barrier function

Minimizes the appearance of redness and irritation

Skin Concerns: Sensitive – Oily - Clogged pores - Blemish prone skin

Why it's different:**Purifies pores**

A combination of clay, sulfur and salicylic acid works to extract impurities, dirt and toxins from impacted pores. Promoting clear radiant skin.

Strengthens and restores

The reparative, natural properties of zinc oxide help to calm, soothe and reduce redness – even on sensitive skins

MY SKIN CALMER – CBD MILK SERUM

With hemp extract and hemp seed oil extracted from the cannabis sativa plant, this unique serum brings together the power of cannabinoids with deeply nourishing plant oils. With its rich concentration of vitamins, minerals and antioxidants—and without THC—our blend of hemp extract and hemp seed oil offers a host of valuable benefits for the skin. This soothing formula helps to support the skin's strength and resilience, boost elasticity, and helps alleviate visible redness and irritation. The rapid absorption of nourishing oils ensures skin feels soft and soothed. Ideal for dry, irritated sensitive skin and rosacea.

Key benefits

- Helps to improve the appearance of dry, tired and sensitive skin. Calms and soothes while deeply nourishing the skin
- Restores the appearance of strength and resilience
- Boosts skin's radiance and glow
- Helps to reduce the appearance of redness and irritation
- Dryness / Stressed skin / Redness and sensitivity / Dullness and uneven texture

Power of CBD

Cannabis sativa and hemp extract contain a very high percentage of CBD, and is packed with amino acids, minerals and vitamins that are essential for healthy looking skin. It offers the myriad benefits of CBD without TCH or accompanying psychoactive effects.

Skin Soothing Extracts

- A blend of botanical extracts delivers moisture to the skin and helps calm signs of irritation, dehydration and fatigue.

Unrivaled Efficacy

- This formula utilizes each ingredient in its most effective form, selected specifically for its ability to deliver real results.

Key ingredients

With its exceptionally high levels of CBD, our hemp delivers the beneficial properties of this potent plant without THC and its subsequent side effects. Hemp seed oil's various benefits include supporting strength and resilience and boosting radiance.

Cannabis Sativa Seed Oil and Hemp Extract Blend Hemp extract and hemp seed oil helps to boost the skin's defenses against dryness, dehydration and sensitivity. It supports the appearance of skin elasticity and promotes overall balance. Rich in amino acids, vitamins and minerals, this pure form of hemp seed oil contains a high percentage of CBD for superior effectiveness.

Chamomile Extract Chamomile extract helps to soothe and condition delicate skin

Calendula Officinalis Flower Extract (Calendula Extract) Calendula boasts calming and soothing properties.

Phragmites Karka Extract (Reed) Navajo Indians prized this tropical aquatic grass for its ability to alleviate various skin ailments.

Poria Cocos Extract (Fu Ling) Fu ling is a mushroom-like fungus that grows on the roots of pine trees. It teams with Phragmites Karka extract to provide soothing benefits to the skin. This combination helps to restore balance and support barrier function, making the skin more resistant to aggressors, irritants and dryness.

Squalene helps to lock in moisture, leaving skin feeling soft, smooth and supple with a radiant glow.

To Use

Apply to clean skin morning and night. Can be used alone, under moisturizer, and/or under makeup.

Ideal for

Dry, easily irritated skin, delicate, rosacea, sensitivity, rash, itchy, red

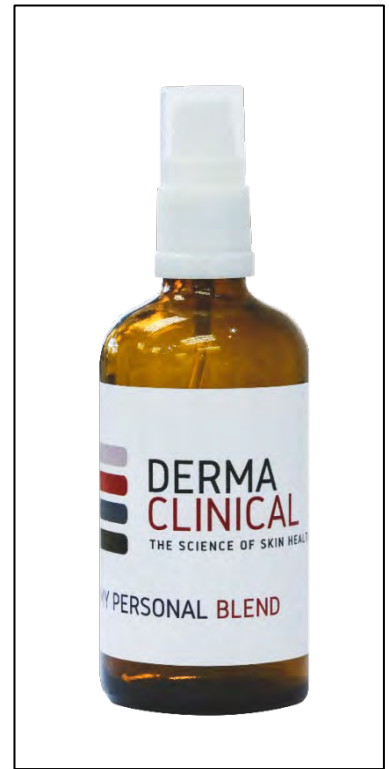

MY SKIN CALMER : SENSITIVE & IRRITATED SKIN

	CLEANSE & CORRECT	TREAT	EYES	COAT	PROTECTION
MORNING	Healing Milk Cleanser Thoclor GF1	Anti Oxidant Power Serum	RX Dark Circles Serum or Super Youth Eye Cream or Ultra Intense Eye Cream	Super Youth Cream or Ultra Intense Cream or Skin Fix	Sun Care Cream SPF 50 or All Light Protection SPF 50
EVENING	Healing Milk Cleanser Thoclor GF1	Bakuchiol Serum or CBD Milk Serum or Essential Lipids (very dry skin)	Super Youth Eye Cream or Ultra Intense Eye Cream	Super Youth Cream or Ultra Intense Cream	
WEEKLY	Lactic Acid 10% Exfoliator (1-2)				Omega 3 Capsules (3 Per Day) Skin Collagen (2.5g Per Day)

MY PERSONAL BLEND

PERSONAL BLENDS:

- Power fill and quench serum + anti oxidant power serum
- Power fill and quench serum + mega 3 brightening serum
- Anti oxidant power serum + mega 3 brightening serum
- Power fill and quench serum + super youth cream
- Power fill and quench serum + super youth eye cream
- Lactic gel + fade fast
- Essential lipids + any cream / serum / vitamin d body lotion
- Cbd + essential lipids

MY PERSONAL ADDITIVES

ADDITIVES:

- ARBUTASE: 1-8 ml into BRIGHTENING CREAM & LOTION
- POWER FILL AND QUENCH SERUM (squalene and HLA): into all serums or creams
- PURE RETINOL: 0.5ML – 2ML into creams, peels, body lotion, serums.
Post needling / peeling
- HLA (professional solutions): into any product for dehydration.
- ESSENTIAL LIPIDS (professional solutions: Ceramides and Squalene to add to any product for more nourishment / oil

DERMA CLINICAL - MY BODY YOUNGER

HOW DOES DERMA CLINICAL MY BODY YOUNGER HYDROLYSATED COLLAGEN WORK?

When consumed, these peptides trigger increased collagen production in our bodies. You can quickly FEEL the benefits of increased collagen production in improved gut and joint health and a host of other improvements

- + IMPROVES CIRCULATION
- + FORTIFIES BLOOD VESSELS
- + PROMOTES HEALING
- + RELIEVES JOINT PAIN AND INCREASES JOINT MOBILITY
- + ASSISTS IN WEIGHT MANAGEMENT
- + TREATS LEAKY GUT SYNDROME

PRODUCT OF BRAZIL

DERMA CLINICAL COLLAGEN HYDROLYSATE contains NO FILLERS, CARBS, SUGAR, FLAVOURS, VITAMIN ADDITIVES or PRESERVATIVES.

It is a PURE PREMIUM product made for people who are knowledgeable enough to make their own choices about nutrition.

RECOMMENDED USE: MY BODY **YOUNGER**

15 grams, mixed into coffee, smoothies, yoghurt, soups, water.

DERMA CLINICAL Collagen Hydrolysate has a very faint and neutral taste and dissolves easily in any food or beverage. (450 grams per month) 2 heaped tablespoons

RECOMMENDED USE: MY SKIN **SOLUTIONS**

2,5 grams per day, mixed into coffee, smoothies etc. (75 grams per month) 1 heaped teaspoon

NEW CLINICALLY PROVEN, BIOACTIVE

DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE

FOR THE PERFECT BALANCE OF YOUR BODY COMPOSITION, TO ENHANCE YOUR LIFESTYLE

To retain optimal body composition and to support your lifestyle, DERMACLINICAL has sourced a clinically proven Bio-active formulae for your body health and wellness.

This formula is a blend of highly specialized collagen peptides that have been shown to decrease fat mass, increase lean body mass and to provide more muscle strength. Even better results are found when used in combination with resistance training.

DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE has positive effects on two main components of the human body: lean body mass and fat mass. Lean body mass, also called fat free mass, comprises mainly muscle mass but also bone mass, connective tissue, and body water.

Muscles are essential for physical activity, stability, and posture, they enable blood circulation and help during the digestion of food. A loss of muscle mass over the course of a lifetime means a loss of mobility, which is followed by a loss of independence and a loss of quality of life.

In summary, the studies confirm that the intake of DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE results in the improvement of mobility in healthy individuals.

The BODY PROTEIN mechanism

The exact mechanism of DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE is still subject of ongoing research, but current data suggest, that the mode of action is based on the multifactorial impact of Bioactive Collagen Peptides® on various metabolic processes and the overall functional unit of muscle: e.g. muscle and fat metabolism.

Recent investigations revealed, DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE significantly stimulates the mTOR pathway.

Availability and activity of this key protein are essential for protein metabolism. The protein metabolism ensures balance between protein synthesis and protein degradation. More synthesis than breakdown indicates an anabolic state that builds lean tissues, higher breakdown than synthesis indicates a catabolic state that decreases lean tissues.

Also, DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE influences fat metabolism. A sufficient energy supply is mandatory for the proliferation of muscle cells and the synthesis of new muscle tissue. The AMPK enzyme is responsible for energy transfer in the muscle cells. The stimulation of AMPK leads to an increase in fatty acid metabolism, which provides more energy for the cells and results in a reduction of fat mass. Due to its specific amino acid composition and its excellent bioavailability. DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE stimulates fat and muscle metabolisms, finally leading to an improved body composition.

Studies confirm the efficacy of DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE ('Body Balance' is the registered name of the peptide complex.)

Several randomized, placebo-controlled, double blinded studies have demonstrated the efficacy and potential of the daily intake of 15 g of DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE in combination with resistance training.

In the latest studies^{2,3}, the effect of post-exercise supplementation on lean body mass, fat mass and muscle strength in combination with resistance training was tested. 114 healthy, physically inactive men aged 35-60 participated.

The primary outcome was to compare 15 g DERMACLINICAL MY BODY YOUNGER – COLLAGEN HYDROSOLATE supplementation with placebo

MY BODY YOUNGER VITAMIN D BODY LOTION

The skin is a complicated organ responsible for many of the body's health sustaining mechanisms such as moisture regulation and vital nutrient synthesis.

Well moisturized and nourished skin, under the right conditions, can convey a youthful and healthy appearance. Dermaclinical Vitamin D Body Lotion is an invigorating lotion that uses a form of vitamin D3 called Cholecalciferol, to aid the skin while it regulates and undergoes its critical health and beauty functions.

With moisturizing anti-oxidant and skin nourishing benefits, this exciting ingredient helps condition and improve the quality of the skin. Combined with the ultra-moisturizing benefits of Olive derived Squalene and water loving Hyaluronic Acid, this super-hydrating formula is excellent for dry, damaged or vitamin D deprived skin, especially useful during the long dry winter months. It provides the necessary moisture to keep your skin fresh and helps compensate for any low levels of Vitamin D due to lack of sun exposure.

Benefits

- Delivers superior moisturization and skin nourishment
- Provides a topical boost of health stimulating Vitamin D3
- Delivers anti-oxidant benefits
- Helps reduce skin wrinkling and dehydration line

How it works

Vitamin D is an integral vitamin most commonly associated with good bone health, disease prevention, and immune system reinforcement.

Usually it is synthesized in small amounts naturally by the skin when exposed to UV light from the sun.

Dermaclinical Vitamin D Body Lotion, provides a form of Vitamin D3 called Cholecalciferol. On the surface, it exhibits antioxidant effects and functions as a topical Vitamin D3 supplement.

This is an excellent body skin aid during all seasons. Thanks to Vitamin D3's exceptionally easy absorption rate, it is a great skin conditioner and moisturizer.

Our laboratories have utilized Squalene and Hyaluronic Acid in the base of this formula (both water loving ingredients and excellent hydrators, to obtain a potent moisturizing effect.

MY BODY RESTORED – GUT KIT & CAPSULES

Introduction

We are rooted in science but driven by passion of preventative health care!

Moving from dis-ease to at-ease

DC MBR is in the business of ensuring targeted individualised nutrition. Our partner labs and leading Scientists formulate and manufacture supplements, personalised to the needs of your body, as determined by a scientifically proven test, which assesses imbalances at a cellular level.

Why supplement?

The world we live in today continually undermines the perfect balance our bodies were designed to have. Poor eating habits, impoverished food and soil sources, harmful chemical additives and stressful lifestyles, leave most people with a compromised internal health ecosystem.

We supplement to ensure that our bodies receive the nutrition required to fuel the millions of biochemical processes that need to take place to keep healthy and to function optimally.

Glutathione

The Glutathione we supply is the only one with proven studies showing absorption and is naturally fermented, as opposed to chemically synthesized, Dermaclinical Glutathione capsules are chosen for the study results based on safety, efficacy and quality.

GUT PREPARATION KIT

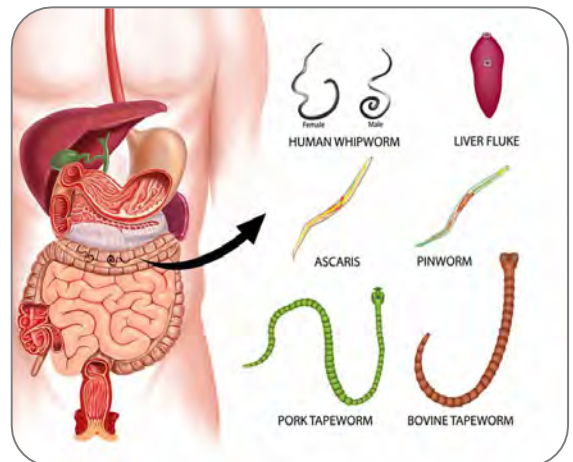

INCLUDED IN THE KIT IS THE FOLLOWING:

- A. THE GUT FLUSH – PARASITES AND PREP(CAPSULES)
- B. THE REAL GUT FLUSH (EPSOM SALT & VIT. C CAPSULES)
- C. OLIVE OIL – PATIENT TO BUY OWN
- D. GRAPEFRUIT OR PINAPPLE JUICE – PATIENT TO BUY OWN
- E. INTESTIFLORA

Gut flush is one night only!

The Parasite Cleanse - Common risk factors:

- Eating raw or undercooked fish or meat.
- International travel, especially to developing countries.
- Frequently swimming in lakes, rivers, or streams.
- Close contact with children, pets, and/or insects.
- Poor hygiene and hand-washing.
- Compromised immune system.
- Poverty and malnutrition.
- Hot and humid climate.
- Handling cat litter.

Ingredients in the Parasite cleanse:

Aniseed
Black Walnut Hull
Cloves
Garlic
Ginger
Olive Leaf
Thyme
Wormwood

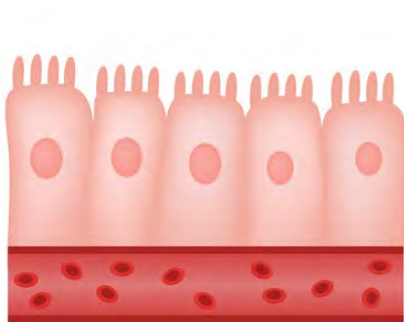

THE REAL GUT FLUSH

Ingredients:

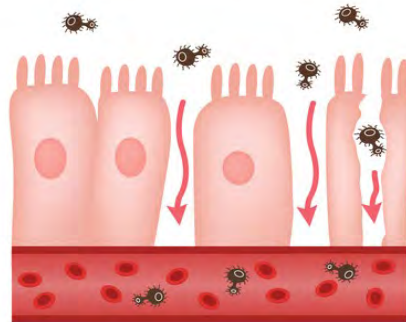

Epsom Salt Mix in caps

Epsom Salt

Vitamin C

Normal Tight Junction

Leaky and Inflamed

Neutralize the effect of a leaky gut, where microscopic endotoxins damage your health and digestion

Natural, pure ingredients, no filler / sugar etc.

Builds the intestinal wall

GUT REPAIR & PROTECT

Ingredients:

L-Arginine L-Carnitine L- Glutamine

L- Glycine L- Proline L- Threonine

Bromelain Curcumin (Turmeric)

Inulin (Prebiotic) Malic Acid

Ginger Root Peppermint Leaf

Psyllium Husk 95% 60 Mesh

Quercetin Vitamin B1

Vitamin B7 (Biotin) Vitamin B12

Vitamin C Zinc Glycinate

PROBIOTIC SPRAY

FOR THE RESTORATION OF THE NATURALLY OCCURRING BACTERIAL INTESTINAL FLORA. THIS PRODUCT IS A GENERAL PROBIOTIC, THEY SHOULD BE USED ON A DAILY BASIS AS PROPHYLACTIC PRODUCTS TO REPLENISH THE NATURAL OCCURRING FLORA/PROBIOTICS IN YOUR GUT.

THE FORMULATION CONTAINS:

ONE STRAIN THAT FUNCTIONS MAINLY IN THE SMALL INTESTINE (LACTOBACILLUS ACIDOPHILUS) & TWO STRAINS THAT FUNCTIONS MAINLY IN THE COLON (BIFIDOBACTERIUM LONGUM & BIFIDOBACTERIUM BIFIDUM)

OMEGA 3

A Professional refined fish oil in a soft gel gelatin capsule

GMP, HACCP, ISO9001, OHSAS assured and approved quality processes and standards. Contains Anchovy, Salmon and Tuna. Gluten, wheat, dairy, yeast, sodium and sugar free. Ratio of EPA = 18% to DHA 12%

Each capsule is 1000mg, 90 caps in the container.

PROBIOTIC SPRAY

What are Omega-3s? Omega-3 fatty acids are a collection of polyunsaturated fatty acids which include eicosatetraenoic acid (EPA) and docosahexaenoic acid (DHA). These can be found naturally in fish. Another fatty acid in Omega-3s is alpha-linolenic acid (ALA) which is found in plants. ALA is an essential fatty acid which must be obtained from food or supplements.

What does Omega-3 do? The body does not produce its own Omega-3 fatty acids, so getting them from food or supplement sources is important. Omega-3 fatty acids help control blood clotting and help build cell membranes throughout the body. They also affect how cell receptors in the membranes function. When enough Omega-3 is in the cell membrane, the long and flexible structure allows a better flow of nutrients and wastes to enter and exit the cell. Wastes are also prevented from re-entering the cell.

Anti-inflammatory Omega-3 fatty acids are anti-inflammatory in nature. Omega-3 works to lessen the effects of inflammation by blocking multiple inflammation pathways in the cell.

Other benefits Omega-3s can have a great deal of benefits for supporting a healthy heart and brain and other functions of the body.

Lower Triglycerides: Omega-3s can help lower elevated triglyceride levels. Infant Development: DHA is known to be an important factor in contributing to **visual and neurological development** in infants. **Memory Improvement:** Some research even suggests that Omega-3s might be beneficial for those with Alzheimer's and Dementia. **Heart Health Improvement:** Omega-3 fatty acids are a form of polyunsaturated fat that helps support heart health. These "good" fats are essential to your body and can help reduce the risk of heart disease

CHEAT SHEET BY CONCERN

DERMASYSTEM

- RETINOL 100 serum, or RETINOL 50 cream, BAKUCHIOL to stimulate the fibroblast production and activate skin machinery
- COLLAGEN PEPTIDES (MY SKIN YOUNGER) to ignite the machinery into producing mega collagen
- LACTIC ACID / GLOSS PADS / LACTIC+ FADEFEST BLEND mini peel, to produce GAG's, that will assist in the 'trellis' work in the dermis, so the collagen structures can lay flat
- ANTI OXIDANT POWER SERUM to protect the new structures from damage – external and internal

PIGMENTATION

- RETINOL 100 SERUM, OR RETINOL 50 CREAM, RETINOL 500, BAKUCHIOL
- BLOBS of pigmentation: FADE FAST (night only)
- BLENDING the skin (for discoloration that is not too extreme in contrast) : BRIGHTENING LOTION + 3 ml ARBUTASE
- STUBBORN MELASMA: BRIGHTENING PADS or BRIGHTENING CREAM + 3-5ML ARBUTASE
- HORMONAL PIGMENTATION: MEGA 3 BRIGHTENING SERUM
- THOCLOR GF2
- SUN CARE CREAM SPF50 / ALL LIGHT SUN CARE SPF 50
- MY SKIN BRIGHTER – MICRO POLISH (1-2 X PER WEEK), OR
- MY PERSONAL BLEND: LACTIC ACID 10% GEL + FADEFEST (AT HOME MINI PEEL FOR PIGMENTATION)

ACNE

- RETINOL 100 SERUM (pm)
- SALICARE SERUM (am)
- MOISTURE LOTION (on top of serums if needed)
- DEEP PORE WASH
- PUMICE CLEANSER (up to 3 x per week, skin texture dependent)
- DEEP PORE MASK
- THOCLOR GF2
- PIMPLES BE GONE (PM) ON PIMPLES ONLY)

BARRIER REPAIR

- HEALING CLEANSING MILK
- SKIN FIX (as a coat day and night)
- SKIN FIX ULTRA – very rich cream that also brightens
- ULTRA INTENSE CREAM (very dry skin)
- HEALING MILK CLEANSER
- ANTI OXIDANT POWER SERUM (am)
- BAKUCHIOL / RETINOL CREAM or SERUM (pm)
- SUN CARE SPF 50 / ALL LIGHT PROTECTION SPF 50
- THOCLOR GF2

AGEING

LIFT: SUPER YOUTH SERUM & MSY COLLAGEN PEPTIDES

REGENERATE: RETINOL 100 SERUM / RETINOL 50 CREAM / BAKUCHIOL

BOTOX EFFECT: SUPER YOUTH CREAM / SUPER YOUTH EYE CREAM

VERY DRY AND FRAGILE: ULTRA INTENSE EYE CREAM AND UI CREAM / ESSENTIAL LIPIDS

PLUMP AND FILL: POWER FILL AND QUENCH SERUM

DEHYDRATION AND DRYNESS: POWER FILL AND QUENCH SERUM / INTENSIVE ANTI-AGE MASK / BAKUCHIOL SERUM

THOCLOR GF2

SUN CARE SPF 50 / ALL LIGHT PROTECTION SPF 50

PROTECT, NOURISH AND BRIGHTEN: SKIN FIX ULTRA

EYES

LINES AND FLACID SKIN: SUPER YOUTH EYE CREAM / BAKUCHIOL

DARK CIRCLES (circulation): RX EYE SERUM

DARK CIRCLES (pigmentation in the trough): BRIGHTENING CREAM + 2ML ARBUTASE

DRY AGEING EYES: ULTRA INTENSE EYE CREAM

ROSACEA / SENSITIVITY / EXCEMA

CBD MILK SERUM

ESSENTIAL LIPIDS

THOCLOR GF2

HEALING MILK CLEANSER

SKIN FIX

SUPER YOUTH CREAM (Resveratrol)

ULTRA INTENSE CREAM

INGROWN HAIRS

DEEP PORE WASH

GLOSS PEELING PADS

SALICARE SERUM

DEEP PORE MASK

THOCLOR GF2

POLARIS KERATOSIS

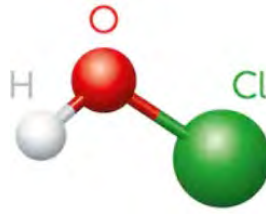

DEEP PORE WASH

GLOSS PEELING PADS

SALICARE SERUM

VITAMIN D BODY LOTION + 2ML PURE RETINOL (start slowly)

THOCLOR

What is it?

HYPO CHLOROUS ACID – produced by the bodies own white blood cells.

For the first time, this 3rd generation product has been made outside the human body.

Very strong disinfectant:

- Most powerful germ killer known
- Selective activity against disease-forming germs
- Effectively penetrates and destroys biofilms
- NOT damaging to wound cells
- Cause physical destruction of all pathogens: virus, bacteria & fungi

Strong anti-inflammatory: Reduces pain, swelling and redness

Extremely safe on all membranes: mouth, nose, eyes, vaginal, intravenous

Stimulates wound healing = Accelerated migration and activity in Fibroblasts

Corrects pH immediately

- Prevents complications (Infection, pain, redness, pigmentation scarring).
- Makes darker skin types (IV – VI) eligible for skin manipulation.
- Alleviates PIHP
- REDUCES DOWNTIME – Speeds renewal
- OPTIMISES and speeds up RESULTS

GF2 Skin Rejuvenation
Medical Device Class A
250 mg/l HOCl, pH 5.5

GF1 Aftercare
Medical Device Class C
(Suitable for use on open wounds)
350 mg/l HOCl, pH 5.5

Stanford University Study

1. The genes that are responsible for inflammation, disease and ageing (the same genes) in the skin identified.
2. When activated, they initiate inflammation, leading to ageing and disease.
3. The common pathogenesis of skin ageing and disease is therefore INFLAMMATION
4. Previously no treatments have been available to prevent the activation of these genes or at the treatment of inflammation, disease or ageing

HOCl blocks and reverses inflammation, ageing and disease

Other conditions that GF2 can impact

- Acne: reduces dead cell layer blocking the oil glands, regulates oil secretion, reduces inflammation, kills P bacteria
- Pigmentation disorders: normalises melanocyte function, allows for wash-out of excess pigment
- Rosacea: strong infection and inflammation control
- Eczema: positive control of inflammation and itchiness in a large % of cases
- Keratosis or sun spots
- Skin redness
- Dermatitis, seborrheic dermatitis

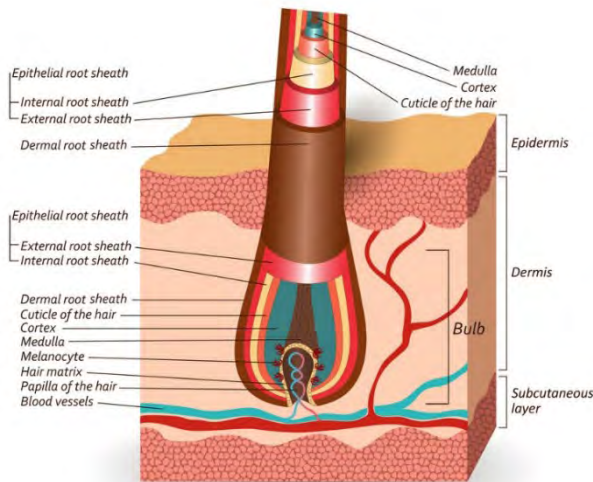

NO GROW

INTRODUCING LASER HAIR REMOVAL IN A TUBE

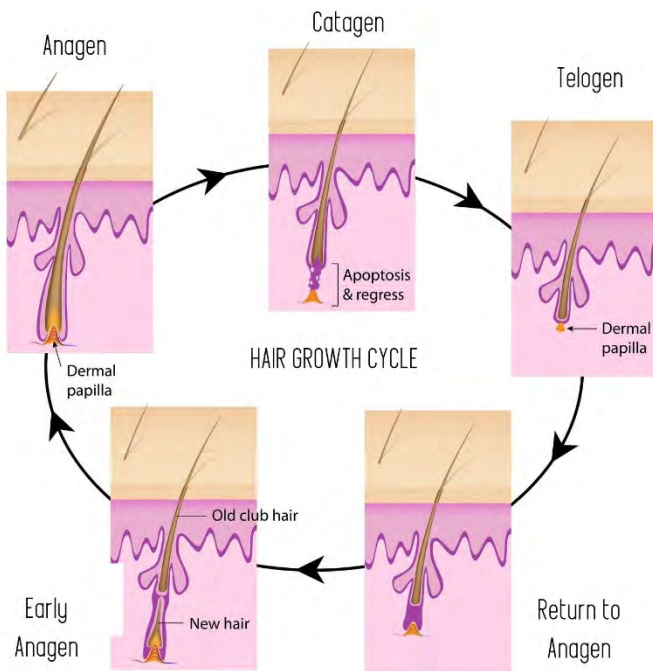

Anatomy of the hair bulb

- To allow passage of the active ingredient Isoquinolinium Bromide to penetrate down to the matrix bulb of the hair root, No Grow dissolves hair below the surface of the skin and “pulls” the active ingredients down the hair shaft to the hair matrix bulb – the place where hair growth starts – and in this case – stops. Because of its low molecular weight, it is able to penetrate deep inside the hair shaft.
- Every time you use the cream less and less hair will grow back until at the end of the cycle you should have **achieved 99.5% hair reduction**.
- No Grow needs to be applied every week for 7 - 8 months, for the cycle of hair growth to be fully covered. The cream reacts with the root when in the Anagen phase of the growth cycle.
- Cell division is takes place during the growth cycle. The new cells propel the hair forward and make it grow longer, therefore the new hair is added at the root.
- By bio-engineering these cells, in the matrix bulb of the hair root, replicates the cell activity found at the onset of male pattern baldness.
- By introducing new genetic instructions to the matrix, the follicle is programmed to neutralise the hair root and stop further growth activity.
- This discovery, together with the unique transdermal delivery technique which enables No Grow Hair Remover to be efficiently delivered to the hair root.

Hair growth phases

- A N A G E N : active phase of hair growth
- C A T A G E N : is the transitional phase
- T E L O G E N : is the resting phase.
- Treatment of the hair root with No Grow can only take place during the Anagen phase. Therefore,
- Hair that is in the Catagen or Telogen Phase will not respond to treatment.
- That's why No Grow Hair Removal Cream must be applied at weekly intervals, once every week to ensure that all hair in all growth stages has been treated.
- Continue use for 8 months

The key ingredient

- Growth Inhibitor ingredient, LAURYL ISOQUINOLINIUM BROMIDE, bio-engineers the matrix bulb to neutralise hair roots to stop hair growing
- For the first time, able to achieve in a long-term cessation (ending) of hair growth.
- Cell division is responsible for the hair growth cycle. The new cells push the hair forward to make it grow longer, so the new hair is added at the root.
- By bio-engineering the cells in the matrix bulb of the hair root to replicate the cell activity found at the onset of male pattern baldness, scientists have succeeded in halting hair growth.
- By introducing new genetic instructions to the matrix, the follicle is programmed to eradicate (destroy) the hair root and stop further growth activity.

Nano Enhanced Cross Transportation Technology

- Technology used to manipulate the molecular structure of the active ingredients, breaking it down so fine that it is able to penetrate into the desired area for a period of 8 hours with the aid of TLR (time controlled release).

How to use it

- Ensure skin is clean (remove oils, sebum, make-up or creams from the skin)
- Apply twice the thickness of a credit card on the area
- Leave on for prescribed time
 - Face: 5-10 minutes
 - Body: Maximum 20 minutes
 - Intimates: 10-15 minutes
- Remove excess with spatula
- Rinse off with warm water
- Do not apply anything over the treated area, unless skin is sensitive, then apply the No Grow Aftercare Gel

In Summary

- No Grow replicates the effects of laser hair removal but it achieves its goals by a very different scientific method.
- For the first-time researchers have been able to take human dermal papilla cells from inside the base of human hair follicles and recreate cell structure found in patients with male pattern baldness. LAURYL ISOQUINOLINIUM BROMIDE replicates these cells which stifles new hair growth.
- The breakthrough came with the development of LAURYL ISOQUINOLINIUM BROMIDE compound which modifies the growing behaviour of hair roots, resulting, for the first time, in a long-term cessation of hair growth.
- By bio-engineering the cells in the matrix bulb of the hair root to replicate the cell activity found at the onset of male pattern baldness, scientists have succeeded in restricting hair growth.
- When introducing new genetic instructions to the matrix, the follicle is programmed to neutralise the hair root and stop further growth activity.
- This discovery, together with the unique transdermal delivery technique which enables No Grow's active ingredients to be efficiently delivered to the hair root, is changing the beauty regime of millions of men and women.
- For the first time a product is available which modifies the growth activity of the hair root, but without damaging the skin or causing pain to the patient.
- No Grow was one of the first to develop 'nutrient engineering' techniques which restrict the flow of nutrients to the matrix hair bulb. This results in the miniaturisation of the hair root and ultimately restricts the growth of new hair

Clinical trials

- Out of 78 candidates who participated in the clinical trials, 74 achieved permanent hair removal (**94,5% success rate**)
- Candidates covered all genders and all races
- Body areas covered in the trial arms, legs, back, chest, underarms, intimates and face
- All 4 candidates that did not complete the trial successfully, all had allergies to Aloe or the bonding agent

GET LEAN

What is it

Get Lean contains a multitude of natural ingredients that help your body burn fat and store less calories. Get lean is a professionally formulated fat burning supplement, specifically created for both Men & Women. Get lean's proven ingredients include powerful antioxidants and essential minerals designed to help you achieve your fitness goals.

It's common knowledge that lowering your calorie intake, combined with cardio and weight-bearing routines are the main ingredients for cutting fat and building muscle. Adding a fat burner to your diet, like Get Lean, will dramatically enhance those results, and boost you to your perfect body goal. Get Lean contains a multitude of natural ingredients that help your body to burn fat and store less calories.

Pyridoxine is a water based vitamin necessary for the metabolism of protein, fats and carbohydrates, as well as the creation of red blood cells and neurotransmitters. It increases thyroid hormone function which speeds up your metabolism. Resulting in weight loss and the depletion of fat stores..

Maxi Tonic also aids the necessary increase in metabolism for weight loss by ensuring that less calories are converted to fat.

Hoodia helps suppress those toxic cravings.

Ginseng increases your energy and stamina levels.

Mist senna promotes a healthy digestive system and helps prevent water retention.

Is Get lean completely safe?

Absolutely! Get lean's safe and effective formula only uses natural ingredients and each capsule is produced in MCC registered facilities, meaning you are getting a product you can trust. We also avoid synthetics so you won't experience any unwanted side effects.

What should I eat when taking Get Lean?

We always recommend taking Get lean in conjunction with a healthy lifestyle.

To maximize your results we recommend committing to the eating plan set out by your complimentary dietician as well as making sure you drink plenty of water and commit to your complimentary training programme.

FUSION

Ready to use cocktails

F-XFC

F-LIFT

F-MESOMATRIX

F-BTX

F-RADIANCE

F-VENOSTIM

F-EYE CONTOUR

F-PERFECT LIPS

F-ACN

F-XBC

F-HAIR MEN

HA +

Triple sterilised by micro-filtration, protecting the active ingredients – no gamma ray sterilisation
Cutting edge formulae with very active ingredients.
Premixed cocktails – ready to use

Key benefits of fractional meso

- Induction of collagen by controlled wounding. Collagen induction builds layers of the supporting intracellular matrix, promoting healthy, resilient skin that looks younger.
- Increase the transdermal transport of active ingredients up to the dermal level. Skin needling creates channels through which any substance applied to the skin surface (know as topical application) can be absorbed.
- Make sterile topical treatments more effective.
- Studies suggest that using a skin needling system boost the effectiveness of sterile topical treatment by several hundred percent. This vastly improves the effectiveness of products, but increases the risks of infection and allergic reactions. So it's important to use only sterilised cocktails and adapted post treatment care like Medi PH Toner. Medi Mask . Vir A- K serum only.
- Most affordable long lasting skin rejuvenation procedure.

F-XFC

Bio-revitalisation for customers of less than 40. Cellular nutrition to prevent and reduce the signs of skin ageing.

6 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents, taurine, glutathione.

Description:

F-XFC formula is skin booster with more than 63 active ingredients. The main function of the product is to provide metabolites to the cells to stimulate their metabolism (production of energy, proteins and cellular growth). This exclusive blend contains all the nutrients and the molecules involved in the Krebs cycle. These nutrients are essentials for the production of energy (ATP) and boost the skin functions. As there are no blood vessels in the epidermis, the cells are nourished exclusively by passive diffusion of plasma from the dermis. While ageing, the skin is in lack of nutrients and oxygen due to a less performing circulatory system.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté and hands.

Meso protocol:

Depth of treatment: 0 to 1 mm - Dose: 5 ml per treatment (face & neck)

Technique: intra-epidermic nappage.

Targeted tissue: Epidermis, superficial dermis.

Targeted cells: Fibroblast, keratinocytes.

Frequency of treatments: every 2 weeks, 1 every 2 months as maintenance.

F-XFC+

Bio-revitalisation for customers of more than 40. Cellular nutrition to prevent and reduce the signs of skin ageing.

6 Minerals, 23 amino acids, 18 vitamins, 6 co-enzymes, 5 nucleic acids, 2 reducing agents, taurine, glutathione, EGF & FGF growth factor, hyaluronic acid.

Description:

F-XFC+ formula is skin booster with more than 63 essential nutrients, growth factors and hyaluronic acid. The main function of the product is to provide metabolites to the cells to stimulate their metabolism (production of energy, proteins and cellular growth). The growth factors stimulate the mitosis of epidermic cells and fibroblast. The hyaluronic acid improves skin volume and moisture. The gel texture is allowing a slower release of the active ingredients into the skin for a prolonged effect. This exclusive blend contains all the nutrients and the molecules involved in the Krebs cycle. These nutrients are essentials for the production of energy (ATP) and boost the skin functions. As there are no blood vessels in the epidermis, the cells are nourished exclusively by passive diffusion of plasma from the dermis. While ageing, the skin is in lack of nutrients and oxygen due to a less performing circulatory system.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté and hands.

Meso protocol:

Depth of treatment: 0 to 1 mm - Dose: 5 ml per treatment (face & neck)

Technique: intra-epidermic nappage or superficial intradermic papules.

Targeted tissue: Epidermis, superficial dermis.

Targeted cells: Fibroblast, keratinocytes.

Frequency of treatments : 5 every 2 weeks, 1 every 2 months as maintenance.

F-XFC+ FACE

Face lift for customers of less than 40.
Reduction of wrinkles & improvement
of skin volumes.

DMAE, organic silica, hyaluronic acid.

Description:

The active ingredients from "XFC+ FACE" are well known from anti-ageing doctors as they commonly use it in mesotherapy to treat wrinkles and loss of volume. Organic silica is the main ingredient of this formula with various effects as cyto stimulation, free radicals blocker, anti-glycation, anti-wrinkles, firming, collagen booster and anti-inflammatory.

DMAE is an analogue of the B vitamin choline a precursor of acetylcholine. The DMAE is used in dermatology for its potent anti-inflammatory effect and stimulation of the muscle tone reducing wrinkles and skin sagging. Hyaluronic acid is providing moisture and skin volume.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté.

Meso protocol:

Depth of treatment: 0 to 2 mm - Dose: 5 ml per treatment (face & neck)

Technique: superficial intradermic nappage or papules.

Targeted tissue: Epidermis, superficial dermis.

Targeted cells: Fibroblast, keratinocytes, myocytes (muscle cells).

Frequency of treatments: 5 every 2 weeks, 1 every 2 months as maintenance.

F-LIFT+ FACE

Face lift for customers of more than 40.
Reduction of wrinkles & improvement
of skin volumes.

Hyaluronic acid, Hexapeptide-10,
Carcinine, FGF growth factor, EGF
growth factor, TRX growth factor, EDP3
biomimetic peptide, TGP2 biomimetic
peptide.

Description:

The ultimate non-surgical face lift and anti-ageing product. A synergy of active components acting at various levels to improve the skin condition and reduce the skin sagging. High concentration of 4 biomimetic peptides and 3 growth factors (Fibroblast GF, Epidermal GF, Thioredoxin GF) to energize the skin (stimulate the cellular growth and metabolism), protect from free radicals, reduce inflammation, control pigmentation and highly firm the skin (up to 50% reduction of wrinkles after 3 treatments).

Carcinine is a peptidic compound which is able to protect the skin components such as the collagen from external aggressions (UV, free radicals, stress etc.) and to maintain the metabolic activities of the exposed cells. Carcinine acts in four different, non-exclusive, ways for a maximal efficiency: anti-oxidation, anti-stress, anti-glycation, metabolism stimulation. **Hexapeptide-10** is a firming active that promotes a double-cellular activity on both keratinocytes and fibroblasts. It increases the synthesis of laminin-5, $\alpha 6$ -integrin and hemidesmosomes, thus strengthening the dermo-epidermal junction. Over the years the adhesion between the epidermal and dermal cells is reduced, which results in the loss of skin elasticity. **Hyaluronic acid 500k daltons** is providing intense skin volume, moisture and stimulates the synthesis of collagen. It promotes the regeneration of the dermal structure and elasticity.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté.

Meso protocol:

Depth of treatment: 0 to 2 mm - Dose: 5 ml per treatment (face & neck)

Technique: superficial intradermic nappage or papules.

Targeted tissue: Epidermis, superficial dermis.

Targeted cells: Fibroblast, keratinocytes.

Frequency of treatments: 5 every 2 weeks, 1 every 2 months as maintenance.

F-MESOMATRIX

Reduction of scars and stretch marks.

Hyaluronic acid, FGF growth factor, EGF growth factor, centella asiatica extract.

Description:

Our exclusive MESOMATRIX formula is designed to restructure and regenerate the dermal matrix. It is recommended for the treatment of deep wrinkles, scars and stretch marks. The epidermal and fibroblast growth factors are acting in synergy with the centella asiatica extract and the hyaluronic acid. Growth factors act on stem cells, they stimulate the formation of new cells and increase the cellular metabolism. Treatment after treatment the skin recovers a normal and young appearance.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté, body.

Meso protocol:

Depth of treatment: 1 to 2 mm - Dose: 5 ml per treatment

Technique: superficial intradermic nappage.

Targeted tissue: Epidermis, superficial & medium dermis.

Targeted cells: Fibroblast, keratinocytes.

Frequency of treatments: 6 to 10 every 2 weeks.

F-BTX

Prolongs botox results and reduces dynamic wrinkles.

Hyaluronic acid, octapeptides, pentapeptides.

Description:

Botox injections are a popular dermatological treatment to temporarily smooth moderate to severe frown lines. The botox toxin injected in the skin blocks the release of the neurotransmitter ACh as it cleaves the SNAP-25 protein, hence preventing the assembly of the SNARE complex. The nerve signal cannot be relayed, the muscle cannot be contracted and it becomes paralyzed. But such injections need to be applied every six months. F-BTX peptides acts on the modulation of muscle contraction by reducing ACh release at the synapse, as it competes for a position in the SNARE complex but also blocks the entrance from calcium ions, which is necessary for vesicle fusion with the membrane. This is the perfect complement to injections as it can potentiate and maintain the effect of toxins micro-injections for a longer period of time.

The anti-wrinkle effect of F-BTX + botox was increased by 3 folds compared to only botox in the frontal region after 6 months and it decelerated the reappearance of expression lines in the crow's feet area.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Forehead, crow's feet.

Meso protocol:

Depth of treatment: 1 to 2 mm - Dose: 5 ml per treatment (forehead and temples)

Technique: intradermic nappage.

Targeted tissue: Superficial & medium dermis.

Targeted cells: myocytes (muscle cells).

Frequency of treatments : 2 months after botox injection, then repeat once per month.

F-RADIANCE

Treatment of photo-ageing and pigmentation disorders.

Glutathione, retinol, vitamin C, TGP2 biomimetic peptide, acetyl Glycyl Beta-Alanine peptide, TRX growth factor.

Description:

F-RADIANCE is an outstanding treatment to reduce dark spots, even out tone and enlighten without causing skin irritations. Pigmentation is a complex process and the result of the melanocytes stimulation mostly by UV. Melanogenesis includes 3 major processes: melanosome formation, melanin synthesis and melanosome transport. The synthesized melanin in mature melanosomes will be subsequently distributed to neighboring keratinocytes toward the upper skin layer resulting in pigmented skin.

The synergy of glutathione, vitamin C, peptides and Thioredoxin growth factor is acting at various level:

- Inhibition of melanin generating enzymes (tyrosinase, TRP-1 and TRP-2)
- Inhibition of melanosome transport by down regulation of melanophilin.
- Inhibition on the melanin production

The retinol is accelerating the mitosis of basal cells for a faster skin renewal. By accelerating the skin turnover, we eliminate the keratinocytes charged with melanin.

After few applications, the skin tone is enlightened, and impressive results are achieved on a long-term basis.

Treatment with F-RADIANCE requires the use of the Meso-shield 50 for a maximum and long-lasting result.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté, hands.

Meso protocol:

Depth of treatment: 0 to 0.2 mm - Dose: 5 ml per treatment (face & neck)

Technique: intra-epidermic nappage.

Targeted tissue: Epidermis.

Targeted cells: Melanocytes, keratinocytes.

Frequency of treatments: 6 to 10 every 2 weeks.

F-VENOSTIM

Target treatment to reduce couperosis and improve skin microcirculation.

Phytic acid, VEGF growth factor, ginkgo extract, tetrapeptide, organic silica.

Description:

Millions of people suffer from skin redness linked to inflammation which may cause general discomfort and influence our personal wellness in our daily and social life. Flushing skin, temporary or persistent erythema, telangiectasia, pustules, papules and itching may be experienced. What is clear is that there is an increase of skin inflammatory metabolites playing a central role in these manifestations and disorders.

Venostim is an innovative product specifically designed to decrease the appearance of facial redness and telangiectasia induced by an excessive inflammatory response. Redness, dilated blood vessels and hyperpigmentation, are visibly reduced. The red areas are less numerous and wide, the intensity is reduced. The skin is more uniform and less marked.

Venostim ingredients including VEGF, organic silica and ginkgo extracts improves the skin microcirculation. Phytic acid helps prevent hardening of the arteries and platelet formation.

Tetrapeptide decreases the appearance of facial redness and telangiectasia caused by an exaggerated inflammatory response. It reduces the release of interleukins (IL-6 and IL-8) induced by 37-amino-acid peptide (LL-37), overexpressed in skin disorders with erythema.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face.

Meso protocol:

Depth of treatment: 0 to 0.2 mm - Dose: 2,5 ml per treatment (face)

Technique: intra-epidermic nappage.

Targeted tissue: Superficial dermis.

Targeted cells: Endothelial cells.

Frequency of treatments: 6 to 10 every 2 weeks.

F-EYE CONTOUR

Improves the eye contour by reducing eye bags, dark circles and wrinkles.

Hexapeptide-10, caffeine, vitamin C, acetyl Tetrapeptide-5, hyaluronic acid, organic silica.

Description:

The eye contour responds and prevent all concerns for this sensitive area in one product: eye bags, dark circles, wrinkles, flaccidity and dryness. No need to look further for the ultimate solution. Peptides and hyaluronic acid reinforce firmness, increase moisture and reduce wrinkles. Caffeine activates the elimination of liquids and blood originated pigments responsible for dark circle color, it also acts to reduce local inflammation. Organic silica and vitamin C restore the dermal matrix to firm the skin. A unique synergy to achieve a beautiful, enlightened eye contour.

Acetyl tetrapeptide-5 fights against oedema-forming mechanisms and shows a decongesting effect, enhancing elasticity and skin smoothness.

Hexapeptide-10 is a firming active that promotes a double-cellular activity on both keratinocytes and fibroblasts. It increases the synthesis of laminin-5, $\alpha 6$ -integrin and hemidesmosomes, thus strengthening the dermo-epidermal junction. Over the years the adhesion between the epidermal and dermal cells is reduced, which results in the loss of skin elasticity.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Eye contours.

Meso protocol:

Depth of treatment: 0.2 to 0.5 mm - Dose: 2 ml per treatment

Technique: superficial intradermic micro-papulas.

Targeted tissue: Superficial dermis.

Targeted cells: Endothelial cells, fibroblasts.

Frequency of treatment : 4 to 5 every 3 weeks.

F-PERFECT LIPS

Lips contouring product. Improves volume and color.

Hyaluronic acid, VEGF growth factor, ginkgo extract, extract of organic mustard sprouts, Acetyl Hexapeptide-38.

Description:

Perfect lips is a product dedicated to improve the definition, volume and colour of the lips.

The volume and hydration of the lips is increased with the hyaluronic acid and the acetyl hexapeptide-38. The peptide has a target action enhancing adipogenesis rate. This leads to a higher lipid accumulation and volume growth in the lips. It stimulates peroxisome proliferator-activated receptor Gamma coactivator 1a (PGC-1a) expression, enhancing adipogenesis rate. This leads to higher lipid accumulation and volume growth in the desired areas like lips.

VEGF, ginkgo and mustard sprouts extracts boost cutaneous blood micro-circulation to provide intense coloration of the lips.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Lip contours.

Meso protocol:

Depth of treatment: 0.5 mm - Dose: 2,5 ml per treatment.

Technique: superficial intradermic papules.

Targeted tissue: Dermis, adipose tissue.

Targeted cells: Adipocytes, endothelial cells, fibroblasts.

Frequency of treatments: 2 to 4 every 2 weeks.

F-ACN

Reduces the pore size, purifies and regulates oily skin conditions.

Canadian Willow herb, Tripeptide-1, retinol, vitamins B2-B5-B6 and C.

Description:

A target treatment for impure skin, oily skin conditions and open pores. Acne is a disorder of the hair follicle and sebaceous gland. It happens when the pores sometimes get blocked with dead skin cells. Sebum which normally drains to the surface gets blocked and bacteria such as *P. acnes* begins to grow and the pore becomes inflamed. Inflammation is what causes a pimple to look red and swollen. The sebum (oil): lubricate and protect skin & hair.

ACN contains bioactive molecules which clearly inhibits 5- α -reductase and *P. acnes* growth contributing to a better acne control and antimicrobial effect. ACN has anti-inflammatory effect, soothing acne-prone skin, reducing skin redness and has a fast relief of skin irritation.

How to use?

The products can be applied by electroporation, fractional meso.

Areas: Face.

Frequency of treatments : 10 every week.

F-XBC

Lipolysis and treatment for all types of cellulite.

Vectorized lipase & hyaluronidase, caffeine, organic silica, L-carnitine & taurine, ginkgo biloba, cynara, melilotus & hydrocotyle extract.

Description:

F-XBC Body is the ultimate treatment to achieve the perfect body. It is acting on various mechanisms to reduce the orange peel aspect, stimulate lipolysis, drain and firm. Only acting on all these biological processes can lead to successful results in particular for cellulite. Vectorized hyaluronidase, artichoke and ginkgo biloba extracts eliminate the accumulated liquids charged with toxins leading to a volume and heavy leg sensation reduction. Vectorized lipase, organic silica and caffeine are stimulating the adipocytes to release fat (lipolysis) while L-carnitine stimulates the fat metabolism into the cells. And to complete the process the melilotus is fortifying the blood vessels to avoid new cellulite accumulation, while hydrocotyle extract firms the skin to reduce flaccidity due to the volume reduction.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Body, double chin.

Meso protocol:

Depth of treatment: 2 to 4 mm - Dose: 5 ml to 10 ml per treatment

Technique: intradermic nappage.

Targeted tissue: Dermis, adipose tissue.

Targeted cells: Adipocytes.

No more than 5 ml the first session and 10 ml for consecutive sessions.

Frequency of treatments: 5 to 10 every week.

F-MELIRUTIN

Stimulation of the microcirculation.

Rutin, troxerutin, coumarin.

Description:

The beneficial effects of this mixture of active ingredients are centred on the lymphatic and venous levels, essential for every cellulite treatment. Rutin is a phenolic antioxidant and has been demonstrated to scavenge superoxide radicals. Rutin has antioxidant, anti-inflammatory, ant carcinogenic, antithrombotic, cyto protective and vaso protective activities. Rutin has significant efficacy in diminishing the venous oedema which is an early sign of chronic venous disease of the leg. It helps strengthen capillaries, protects against some toxins and has anti-inflammatory effects. Melilot can help to treat varicose veins and reduce the risk of phlebitis and thrombosis. Melilot contains coumarins, which is converted to dicoumarol, a powerful anticoagulant. It reduces inflammation and swelling and has wound healing properties.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, body and hairs.

Meso protocol:

Depth of treatment: 1 to 2 mm - Dose: 5 to 10 ml per treatment depending on area.

Technique: superficial intradermic nappage.

Targeted tissue: superficial dermis.

Targeted cells: endothelial cells.

Frequency of treatments: 6 to 10 every 2 weeks

F-HAIR MEN

Androgenic alopecia and hair regrowth.

Hyaluronic acid, D-panthenol, melilot extract, carnosine, organic silica, acetyl tetrapeptide-3, copper peptide, IDP2 peptide, VEGF growth factor, FGF growth factor.

Description:

Alopecia is a common problem affecting both men and women. The most common one is androgenetic alopecia which represent 95% of the cases. Hair are composed of 2 structures: hair shaft and hair follicle. At the base of the follicle is the dermal papilla & ECM. As papilla & ECM new cells grow, they push the previous cells upwards to form the hair. The dermal papilla plays a crucial role in the dermal-epidermal interactions and is of great importance for the hair formation and growth cycle.

F-HAIR MEN treats effectively alopecia with a blend of peptides, growth factors, organic silicium, pantenol and hyaluronic acid. It preserves hair follicle stem cell (HFSC) activity, modulates DHT via 5- α reductase activity inhibition, stimulates ECM renewal, anchoring proteins synthesis and decreases pro-inflammatory cytokines. The acetyl tetrapeptide-3 is a highly innovative active combining a patented four amino acids biomimetic peptide with a red clover extract rich in Biochanin A. Their efficacy is based on the combined action of its two ingredients, allowing direct action on DHT preventing the hair cycle to shorten and hair follicle miniaturization, improving the ECM proteins in dermal papilla surrounding hair bulb for better anchoring in the scalp. They also prevents inflammation which is a contributing factor in hair loss.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Scalp.

Meso protocol:

Depth of treatment: 1 to 2 mm - Dose: 5 ml per treatment.

Technique: superficial intradermic nappage.

Targeted tissue: Superficial dermis, hair follicles.

Targeted cells: fibroblasts, follicles cells.

Frequency of treatments: 10 every week, one per month as maintenance

F-HA & F-HA+

Non-reticulated filler for deep static wrinkles and skin volume.

Non-reticulated hyaluronic acid high molecular weight at 1.8 and 2.6%

Description:

Hyaluronic acid is the ultimate treatment against extreme dryness, deep static wrinkles and loss of volume. Hyaluronic acid is a natural polysaccharide with incredible properties, even more enhanced by the specific form that we are using: high molecular weight for immediate and long-lasting results. Dehydration and loss of firmness are signs of skin ageing that lead to wrinkle formation and sagging of some face areas. Using hyaluronic acid helps to maintain a moisturized and firm skin. Hyaluronic acid improves cellular cohesion avoiding transepidermic water loss and stimulates the collagen I synthesis. The skin is therefore progressively tightened and moisturized. The skin is younger, nicer, both flexible and firm.

How to use?

The products can be applied by electroporation, fractional meso and meso.

Areas: Face, neck, décolleté and hands.

Meso protocol:

Depth of treatment: 2 to 4 mm - Dose: 5 ml per treatment.

Technique: intradermic nappage.

Targeted tissue: dermis.

Targeted cells: fibroblasts.

Frequency of treatments: 1 every 4 weeks.
